

Chemicals Policy for Retailers of Formulated Products

Publication date:

Vision Statement

At _____, our mission is to provide our customers with products that are both effective and made with the safest available ingredients.

Scope

This policy applies to non-edible formulated products sold in our stores.

Supply Chain Transparency

Our goal is to make informed decisions about the products we sell by improving our understanding of product composition. All suppliers must disclose complete product ingredient data to _____ by _____.

Informing Consumers

Our goal is to maintain consumer confidence in the products we sell by providing meaningful and easily accessible product ingredient information.

- a. *Disclosure on product packaging:* Suppliers are required to disclose all intentionally added product ingredients on product packaging by _____.
- b. *Disclosure online:* Suppliers are required to disclose online the identities and functions of all intentionally added ingredients, by product by _____. For our private label products, this information will be made available directly on our website.

Safer Product Design

Our goal is to sell products that perform well and contain the safest available ingredients. To reach this goal, we will:

- a. Develop and share a Priority List of chemicals that suppliers are required to reduce and ultimately remove from products;
- b. Set the expectation that our suppliers use the most current science to ensure that all ingredients in new and reformulated products are safest in class;
- c. Begin certifying our private label products, with _____ by _____ to provide further assurance that they are made with the safest available ingredients, and
- d. Regularly measure the reduction in the use of chemicals we have targeted and the expansion of the use of safer chemicals.

Public Commitment

We will be transparent about our goals and outcomes. We will make public this chemicals policy and progress on implementation through annual status reports.
